PROJECTS

- **Share Now**

  Java, MySQL   GitHub

  It is a desktop application for key-based file sharing built with Java socket programming over TCP, allowing any registered user to upload a file and receive a key, which other users can use to download the file. The application also has several other capabilities. JavaFX is used for GUI.

- **INTAL - INTegers of Arbitrary Length**

  Implemented in C language   GitHub

  Languages like C++ and Java support classes of BigIntegers (100-digit numbers). C, by default, has no such support. This project aims to bring that support to the C language along with basic arithmetic operations like comparison, addition, subtraction, and multiplication, along with applications such as Factorial, Fibonacci, etc.
